A) Continue monitoring without changes.

- B) Investigate the cause of variation.
- C) Adjust the control limits to fit the data.
- D) Discard the data and restart the process.

Analysis:

The correct answer is B) Investigate the cause of variation. When data points fall outside control limits, it indicates special cause variation, which warrants investigation to identify and address the root causes. This aligns with quality management principles emphasizing understanding process variation rather than ignoring or adjusting the data without analysis.

This type of question tests understanding of statistical process control (SPC) concepts, a key area in CQPA preparation. Practicing similar questions helps reinforce the correct approach to process variability issues.
