Plans for Children

Helping your child smile with confidence;

Speak to your dentist today

Plans for Children

Plans for Children allows your dentist to provide the most appropriate dental care programme for your child. This means your dentist plans to stop problems before they start, as well as provide prompt dental treatment when necessary.

Plans for Children allows your dentists to tailor your child's oral healthcare for an agreed monthly payment.

More than just check-ups and dental treatment

Your child's dentist will give you and your child advice and information on maintaining good oral health. Visiting the dentist regularly will encourage your child to take a positive interest in their dental health. It will also help your child overcome any fears they may have about visiting the dentist. In time they should feel comfortable, lose any possible shyness and feel able to ask questions about their daily dental routine.

This helps them understand how to take good care of their teeth, both now and in the future. Your dentist will discuss the best dental treatment plan for your child with you, highlighting what dental treatment is covered and making you aware of any exclusions.

Emergency dental care whenever and wherever you need it

When your child is registered with Plans for Children, they receive mandatory Supplementary Insurance cover. This means that your child is covered in the event of a dental injury or dental emergency, whether you are away from home, on business or on holiday.

Further information, benefit limits and exclusions and full terms and conditions can be found in the Plans for Children Application and Membership Pack.

Dental Emergency Helpline at your service

As part of Denplan's Insurance Services you will also have access to Denplan's 24-Hour Worldwide Dental Emergency Helpline that can give you help to find a dentist for your child wherever you are in the world.

Ask your dentist for details on how your child can become a Plans for Children patient, or call Denplan's Customer Advisor team on **0800 401 402**

Questions and Answers

What do we do?

We are the UK's leading dental payment plan specialist. We handle all the necessary administration, leaving your dentist free to focus time and resources on your child's dental care.

Why is preventive care important?

As a child develops, their oral health can change rapidly. Information and advice on preventive dentistry can help to stop problems developing before they start. In the event that dental treatment is needed, Plans for Children helps to ensure your child will receive the appropriate dental treatment when they need it.

How do I register my child onto Plans for Children?

The easiest way is to arrange an appointment with your child's dentist. The dentist will discuss your child's dental care with you and advise you of the cost. They will ask you to sign an agreement with them, complete an application form and agree a policy start date which is then sent to Denplan. Once this has been received you will have the additional benefit of having your child covered by the mandatory Supplementary Insurance.
